

**MGS 710, Spring 2024**  
**Subduction Zone Geodynamics**  
N373, North Grosvenor, RSMAES

Notes for **paper presenter**:

- Thoroughly read, digest, and understand the main paper; You are the expert for the session and so should be able to respond to detailed questions.
- Survey the related literature in detail (the papers that I suggest; also others that you find).

Notes for **non-presenter**:

- Thoroughly read the main paper so that you can take part in all discussions.

Suggested structure for **paper presenter**:

- What is the overall topic? Why is it important?
- What is the specific question(s) of the study?
- Step through the study (e.g., include all figures).
- Main conclusions.
- Study strengths? Study weaknesses?
- Outlook/more recent work.
